Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8, 9, 11, 12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim (2004/0123875). Kim teaches a method of clipping a claw or nail comprising providing a light source 4, shining the light source 4 through the nail when it is inserted into the clipper to make the nail and any blood vessels visible, light seen through hole 11 in pivot pin 3, and clipping a portion of the nail within the jaws of the clippers.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim in view of Asada et al (2001/0025917). Kim does not teach the use of a red light source. Asada et al shows the use of a red light source 44 used in a finger clip 72,

to flash at a fingernail to detect the amount of blood under the fingernail, page 3, [0030, 0031]. With respect to claims 10 and 13, to use the red light of Asada et al with the clippers of Kim. Would have been obvious to one skilled in the art in order to better view the flow of blood through the body part being viewed.

Election/Restrictions

Applicant's election of claims 8-14 in the reply filed on July 20, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group I, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 20, 2005.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Martin (4,864,183), Jeong et al (6,220,251), Yang et al (6,553,592), Dunn et al (6,827,038), Rambeau et al (2002/0112734), Hermiz (2002/0134395), Bordelon (2005/0087145), Huggans (2005/0132975) and Kondo et al (2005/0174367).
